Jev - Complete Learning Resources

A categorized directory of 48 clickable links: official TypeSafe AI documentation, developer references, cookbooks, production guidance, and independent tutorials.

1. Official TypeSafe AI Resources

Resource	What learners will find
TypeSafe AI Official Website	Introduction to Jev and System One models
Official Documentation	Complete developer documentation
API Console	Account access, API keys, and experimentation
Quick Start	Make your first Jev request
Jev Model Reference	Available models and specifications
HTTP API Reference	Request and response specifications
Complete Documentation Index	All documented pages in one index

2. Core Concepts

Resource	What learners will study
System One Models	The architecture and idea behind System One
AI Primer	Calibrated decisions versus text generation
State	Preparing the input context
Primitives	Understanding Jev's question types
Choice	Selecting one option
Score	Evaluating against an ordered scale
Noul	Probabilistic yes/no evaluation
Confidence	Understanding certainty and uncertainty

3. Python and JavaScript Programming

Resource	What learners will build
Python SDK	Install and configure the Python SDK
Python SDK Usage	Make API calls and process results
Python API Reference	Client classes and methods
Synchronous Python Client	Standard Python scripts
Asynchronous Python Client	Concurrent applications
Python Responses	Read typed answers and confidence
Python Error Handling	Handle API failures
JavaScript SDK	Integrate Jev with Node.js and TypeScript

4. Building Real-World Applications

Resource	Practical application
How to Build with TypeSafe	Design a decision-driven application
Intent Routing	Route customer messages
Confidence-Gated Routing	Escalate uncertain decisions
Composite Scoring	Combine multiple decision scores
Speculative Fan-Out	Evaluate multiple questions together
Example Use Cases	Explore industry applications

5. Official Practical Code Labs and Cookbooks

Resource	Project
Official Cookbooks	Collection of end-to-end recipes
Function Calling	Map requests to typed functions
LLM Guardrails	Evaluate inputs and outputs
Hierarchical Classification	Classify into complex categories
Classification Using Confidence	Build confidence-aware classifiers
RAG Passage Classification	Filter retrieved information
Citation Checking	Evaluate evidence supporting claims
Simple Memory System	Build decision-based memory
Smart Home Demo	Explore a working application example

6. Production and Limitations

Resource	Purpose
Known Jev Limitations	Understand model weaknesses
Python Retry Policies	Handle transient failures
Python SDK Changelog	Follow SDK changes
Agent Skill	Integrate with coding-agent environments

7. Additional Independent Tutorials

Independent third-party resources, not official TypeSafe AI documentation.

Resource	Link / learning topic
Jev API Quickstart	Read tutorial
Jev with Python	Read tutorial
Jev with TypeScript	Read tutorial

Resource	Link / learning topic
Choice, Score, and Noul	Read tutorial
Jev Limitations	Read tutorial
Community Projects	Explore examples
